We invite you all!!

In continuation of the previous "Dementia Conference 2019," the Pulsus organization cordially invites all participants and supporters from around the world to attend the "12th International Conference on [Dementia](#) and [Alzheimer Diseases](#)" (Alzheimer 2021), which will take place in Paris, France on September 03-04, 2021.

Our conference's key goal is to bring together renowned neurologist, neurosurgeons, researchers, health care providers, and special educators in one location to share their expertise and scientific advances in the field of dementia and Alzheimer's disease under the theme "Confront and Allay Dementia by Miscellaneous Pedagogy during COVID19."

Keynote addresses, special sessions, poster presentations, and plenary talks are all part of the conference agenda and the scientific sessions include neurology, dementia, neurosurgery, neuropharmacology, neurological disorders, and so on.

Our conference has a well-balanced speaker lineup that covers both general and relevant topics of interest. Our goal is to provide neurosurgeons, physicians, and everyone else medically interested in dementia disorders with an opportunity to learn about the disease's complex nature, consider local realities, and find better treatments for [dementia conferences](#). We hope you can join us.

This year's conference is no exception, bringing together doctors, professors, students, and participants from all over the world to address the latest developments in the area of Alzheimer's and Dementia.

We hope that the event will challenge and encourage you and that it will lead to the discovery of new knowledge, friendships, and partnerships. Despite the intense curriculum, you will be able to appreciate Paris' exotic and vibrant atmosphere.

We all invite you to join us at this beautiful gathering of professionals and experts in the "City of Lights"

### **Aim of the conference:**

The need for addressing "Alzheimer's and dementia" because they affect the function of the brain rendering one for the lack of memory, thinking, and behavioral changes. These can broadly interfere in their day-to-day life. According to World Health Organization, around 50 million people are affected by dementia, and every year, nearly 10 million new cases are recorded. Our conference aims to bring researchers all over the world in a place and to meet the criteria mentioned below,

- To Meet Experts, Learn in a New Space Global Networking.
- To discover new approaches to advance Alzheimer's and dementia
- To learn new Strategies & Techniques
- To contemplate the pro and cons of the newest researches and techniques.
